---

*My goal is to pursue tasks that allow me to take up new challenges and promote constant learning.
I would like to work with a professional team where I could flourish in gathering information,
brainstorming solutions, interpreting data, and completing challenging projects.
I am excited to grow and experience new opportunities around each corner.*

PROFILE

Analytical Skills:
- Created, analyzed, and debugged C++, Java, Python, and Visual Basic programs.
- Resolved data transfer inquiries and performed tasks outside of the department's responsibilities to meet study deadlines.
- Explored and reworked through documentation for aberrant processes and assisted in updating the corresponding work instructions.
- Resolved non-conformant data received from external labs by working with the project management team.

Organizational Skills:
- Prioritized items for specific studies to ensure data integration into the central database complied with expedited client requests.
- Assisted QA delegate in documenting employee verifications of work instructions.
- Worked on setting up labs to use the referral laboratory interface and ensured potential data will follow specifications.

Innovation:
- Improved or implemented alternative methods on older coding projects with new material.
- Designed webpages using HTML, CSS, JavaScript, and PHP on GitHub.
- Took on role as subject expert for macros outside of our department and assisted my team in implementing them in our workflow to increase efficiency and decrease turnaround time.
